## GreenScene challenge

### The Challenge

We want you to improve your environment and create a better place. We want your project to be unique and imaginative.

### Ideas - you could

It really is up to you! Look around your local area for places that you know where you could improve things for wildlife and for people. Successful projects will help others to better appreciate the environment around them.

### What we are looking for

Your projects will be judged on

- Originality;
- Enhancement of the environment; and
- Benefit to the local community.

### Potential projects could include

- Enhancing a neglected green space near you for the benefit of others.
- Influencing local communities or businesses to go green.
- Creating a new habitat for wildlife.

Last year's winners regenerated an area around their community hall, creating a new area for local people to use that improved people's lives. The Environment Agency's job is to protect and improve our air, land and water. By working together, we can all contribute toward real improvements to our environment for the future.

We hope you're up for the challenge!

good luck and have fun!
