

CYBER CHALLENGE

The Challenge

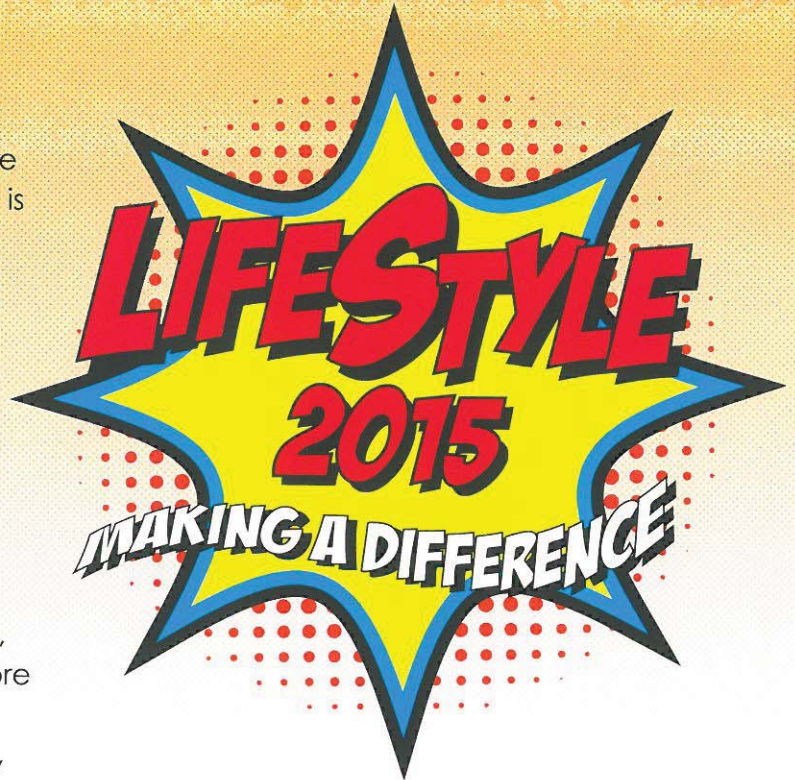

The internet is one of the greatest inventions of the 20th Century. One of the most important ways we use the internet is to communicate, whether with school friends you see every day, or family that live on the other side of the world.

Why don't you see how you can use the internet to enhance and promote your Lifestyle project?

You could:

- Research, research, research
You can use the internet to help you find out about your area, green issues, community information and much more
- Promote your events to get more people involved from your community
- Show other people in your community how the internet works
- Create a 'connect and stay safe' campaign for other young people that raises awareness of potential issues when using the internet.
- You might want to consider giving adults advice on how to help young people stay safe too
- You could even create your own website for your project

The possibilities are endless

Things to think about...

- Make sure you stay safe at all times. Let your parents and guardians know what you'll be doing on the internet
- Never 'connect' with someone on social networking sites that you don't know or agree to meet with a stranger face to face that you have met online
- Always have permission from the person who pays for your internet service
- Always make sure you tell an adult where you are going and what time you will be home

If you need any help with your project contact KC's Community Coordinator, Brendon Smurthwaite, on (01482) 602831 or brendon.smurthwaite@kcom.com
