

GARDEN CHALLENGE

The Challenge

Team up with your friends and create a new garden or improve an existing one.

Look around your community and see who needs your help. Perhaps you could help a local residential home, an elderly person, a neighbour, or school.

Ideas - you could

- Design a sensory garden.
- Design a rockery or raised garden.
- Create a container garden.
- Create an evergreen or alpine garden.
- Design a water garden for relaxation.
- Create a garden to attract birds and wildlife.

Things to think about...

You may need garden tools such as a spade, fork or a rake, ask your adult adviser if they know who you can borrow them from.

- Create a compost heap for grass cuttings and other garden waste.
- Install a water butt to collect rainwater which can be reused.
- Use watering cans instead of hosepipes.
- Use recycled or reclaimed materials for structure and decoration.

Whilst you are doing your project, take lots of photographs before, during, and after. You may also want to design a leaflet telling others in the community about what you've done and how you did it!
