

Modes of Use

- **Drawn:** Removed from holster.
- **Aimed:** Pointed at subject.
- **Red Dot:** Pointed at subject with red dot laser sight active so that red dot appears on subject.
- **Arced:** No cartridge attached. Taser switched on and trigger squeezed in order that electric current arcs between contacts on front of Taser.
- **Fired:** Cartridge attached. Taser switched on and trigger squeezed causing cartridge to fire.
- **Drive Stun:** No cartridge attached. Front of Taser placed against subject and arced.
- **Angled drive stun:** Cartridge on, front of Taser placed on subject away from the barbs and Taser activated.

One officer carrying out any of these will constitute a Taser 'deployment'. Two officers carrying out any of these on the same subject will count as two 'deployments' but one subject.
